CAREER OBJECTIVE

Aspiring full-stack developer with hands-on experience building end-to-end web applications using React.js, Node.js, and Express.js. Proficient in Java and Python as programming languages, with a strong grasp of DSA and OOP fundamentals. Eager to join an innovation-focused engineering team to design and ship new products and grow into complex, high-scale problem solving.

EDUCATION

International Institute of Information Technology, Pune

Bachelor of Engineering (IT) - 8.77 SGPA 2026

Disha Public School & Jr College, Wai

Higher Secondary Education (12th) - 80.5 % 2022

Rameshwar Vidyalay & Jr. College, Wing

Secondary Education (10th) - 91.4 % 2020

SKILLS

Web Technologies: HTML, CSS, JavaScript, Typescript, React.js, Express.js, Node.js

Programming Language: Java, Python, SQL

Database: MySQL, MongoDB

Version Control & IDEs: Git, GitHub, VS Code

Relevant Coursework : OOP, DSA, DBMS

PROJECTS

Quick.ai - AI SaaS Content Creation Platform [🔗](#)

Technologies: React.js, Node.js, Express.js, Neon PostgreSQL, Clerk, Gemini API, Cloudinary

- Developed a full-stack AI SaaS platform for generating articles, blog titles, images, resume reviews, and image-editing outputs through a unified dashboard.
- Integrated secure authentication, subscription-based access control, and protected REST APIs to manage user sessions, feature access, and creation history.
- Built end-to-end AI workflows by connecting external services for text generation, image generation, PDF resume analysis, and image processing.
- Focused on usability and engagement through responsive dashboards, file uploads, markdown-based result rendering, public sharing, and like-based community interaction.

Forever Store - Full-Stack E-Commerce Platform [🔗](#)

Technologies : React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, Stripe, Razorpay, Cloudinary

- Developed a full-stack e-commerce platform with a customer-facing storefront and dedicated admin dashboard for product management, order tracking, and store operations.
- Implemented secure JWT-based authentication, protected REST APIs, refresh-session handling, email verification, and password reset workflows to manage user and admin access.
- Built end-to-end shopping and checkout flows including product browsing, search and filtering, cart management, size-based ordering, and multiple payment options through Stripe, Razorpay, and Cash on Delivery.
- Integrated Cloudinary for product image uploads, automated email notifications and receipt generation for orders, and inventory reservation logic to improve payment reliability and order consistency.

HealthBooker - Doctor Appointment Booking System

Technologies: React.js, Node.js, Express.js, MongoDB

- Developed an intuitive and patient-friendly interface for booking doctor appointments and managing schedules.
- Integrated REST APIs to synchronize real-time appointment availability, user authentication, and doctor details.
- Collaborated on designing the end-to-end booking flow and data mapping between patients, doctors, and appointment slots.
- Focused on convenience and efficiency through responsive dashboards for appointments, profiles, and slot management.
